

# Moving from one embedding tool to another: managing the change process

Jo Ryder & Rachel Fell

# Background

- Lancaster plugin no longer being maintained by staff at Lancaster
- Needed to change to a supported service
- A lot of our reading lists were moving to a weekly structure which provides more flexibility when using Talis LTI

# LRT (Learning & Research Technologies)

- Manage Moodle
- Partners
- Feb 2017 – mini project plan
- Support from colleagues in IT

# Tim's mini project plan

- <https://support.talis.com/hc/en-us/articles/206869725-Talis-Aspire-Reading-Lists-LTI-tool-mini-project>
- Critical steps involved – Audit your IDP to make sure that it uses Platform for Privacy Preferences (P3P) headers in all responses
- November 2017 Talis LTI working alongside Lancaster Plugin

# New list view

- January 2018 turned on the List View beta button for our tenancy.
- June 2018 – switched new list view for all lists
- Realised Lancaster plugin didn't work – reverted to classic view

# Managing two changes

1. Move to new list view
2. Replacing Lancaster plugin with Talis LTI

# Action plan

- LRT provided list of academics using Lancaster plugin
- Only wanted to communicate with those affected by the change

# Explaining the change

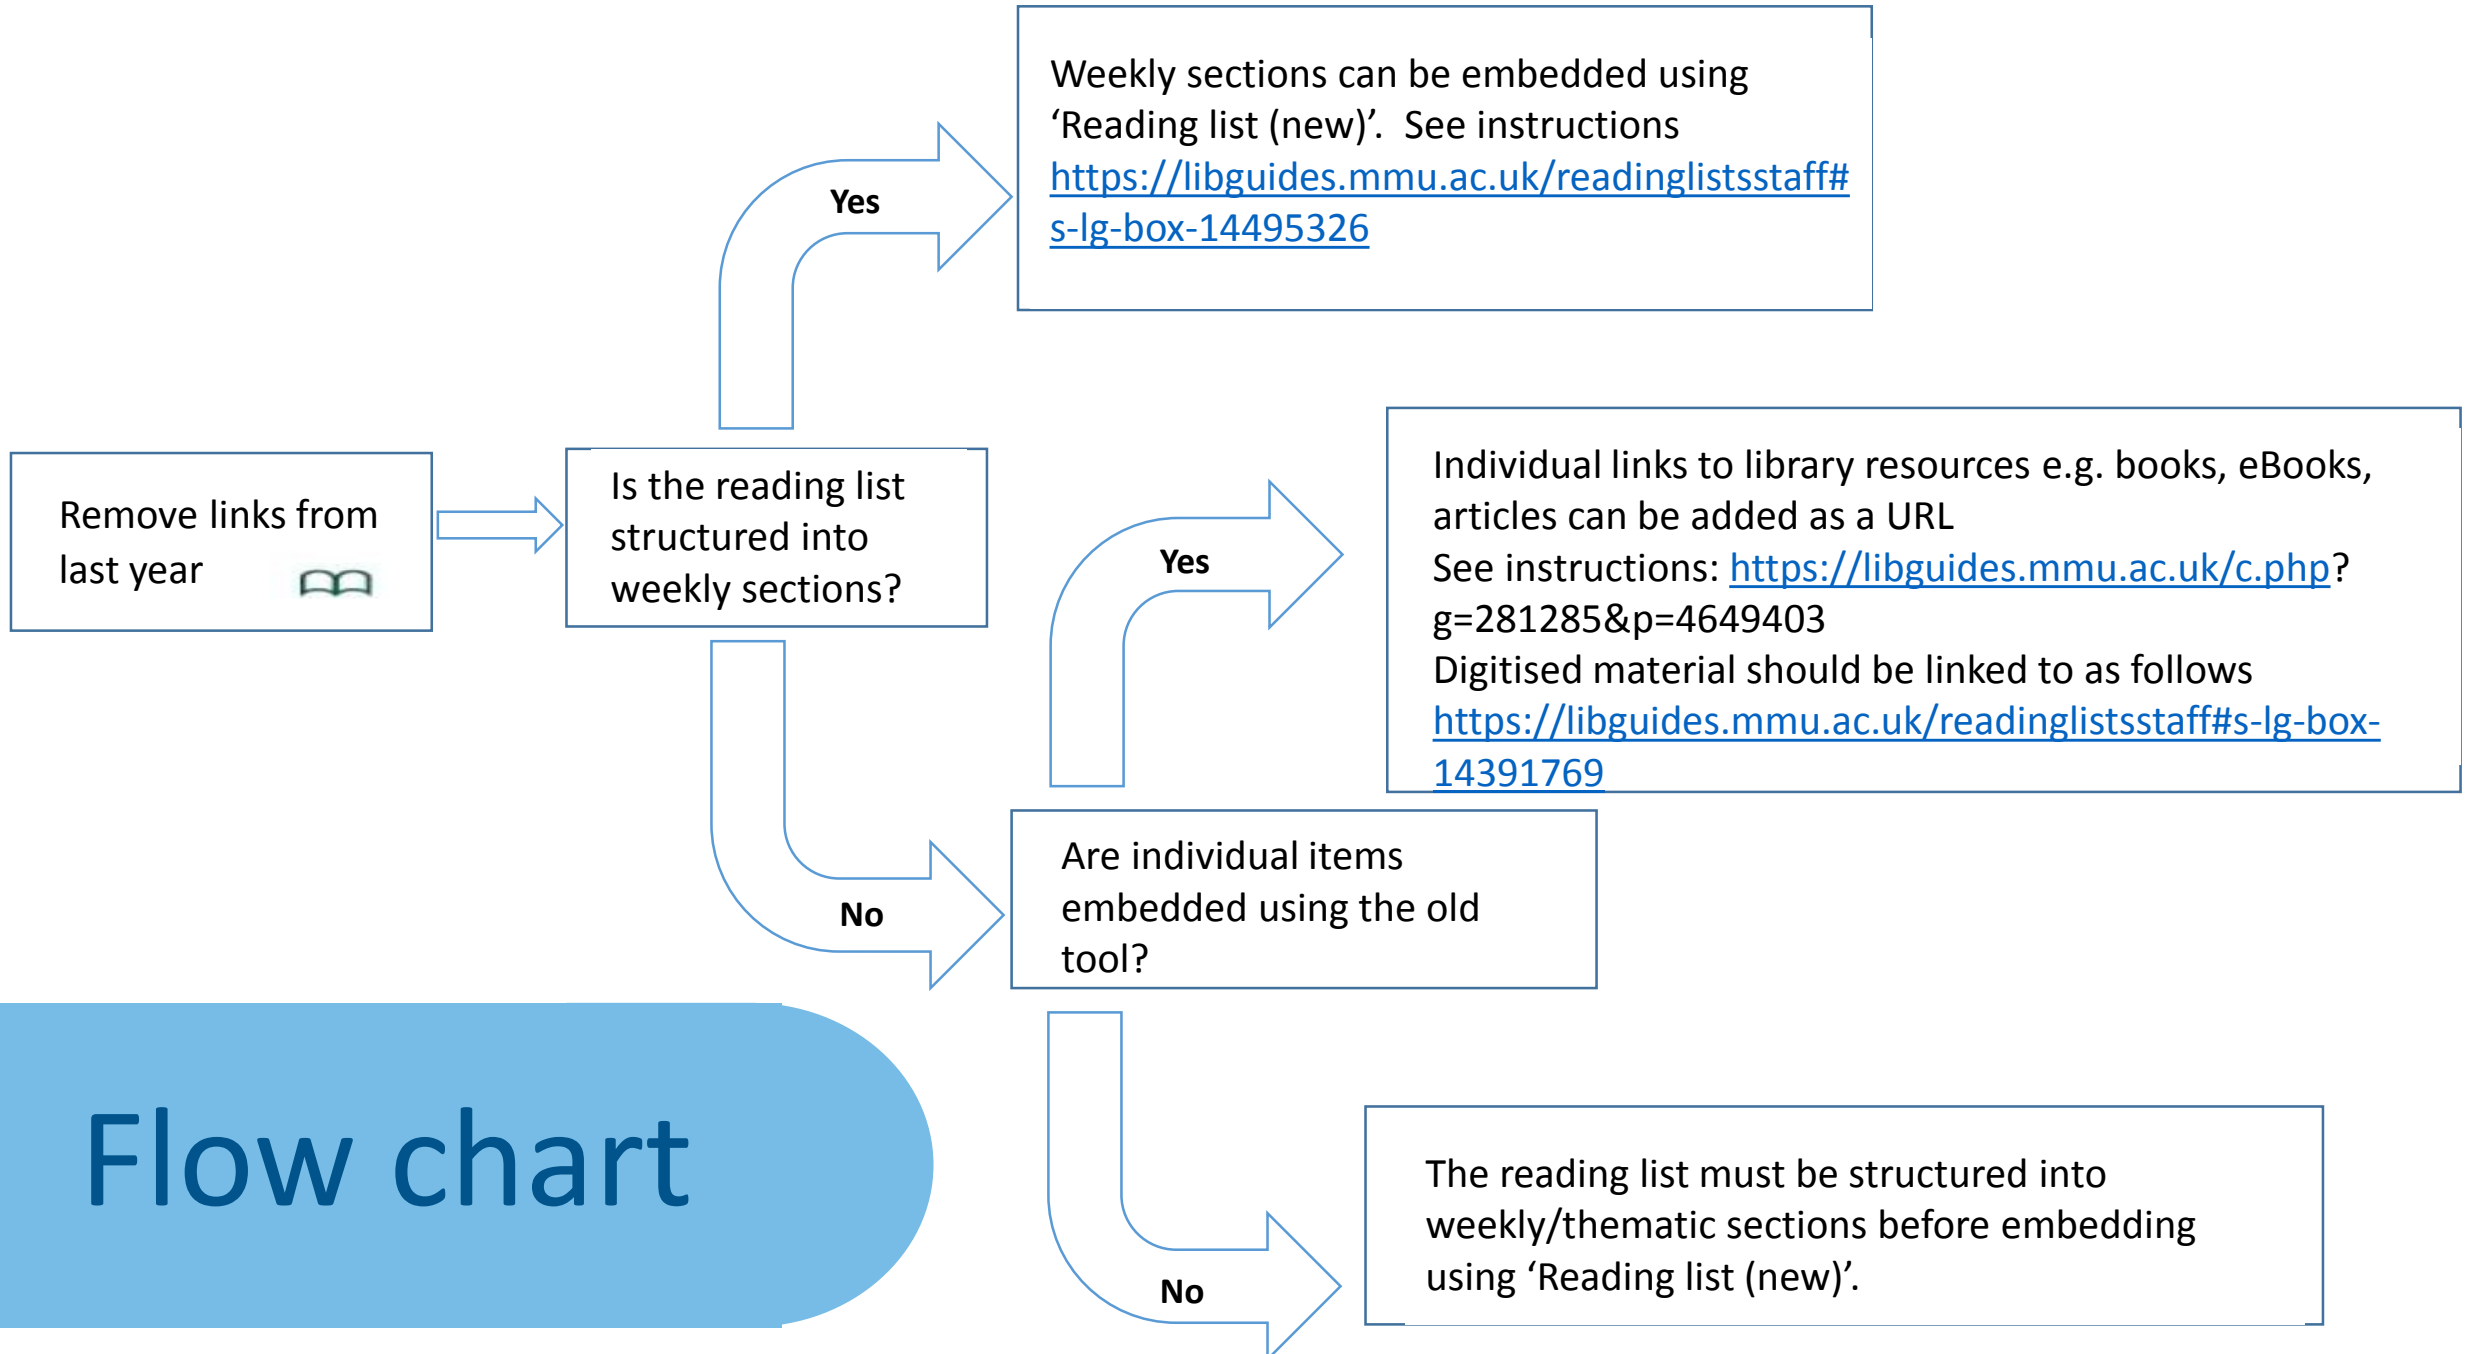

# Communicating change to academic staff

**We are aware that you are currently embedding reading list items within Moodle. The tool you used to do this is being phased out from the beginning of September to make way for a new tool. This means that all the embedded links in your units will disappear in September.**

**In order to prevent this you will need to make changes to your Moodle areas. Please can you get in touch so we can support you through this process.**

# Flow chart

# **Library Staff briefing sessions**

1. Opportunity to explain the change in person to Librarians
2. Flow-chart for reference
3. Answer any questions

# More challenges

Problems with embedding reading list sections in Moodle

Dec 21 2018, 12:31pm

Reading Lists

Internal

Issue resolved

Following the [changes we made to our login page on 17th December](#), we've noticed an issue with [embedding reading list sections in Moodle](#).

This process is being prevented by some browser security settings.

The workaround is to use an up to date version (71) of Google Chrome as your browser, rather than Edge or IE.
